

Raja Senthilkumar

Overview

Skilled and versatile Full Stack Developer with over 3+years of hands-on experience in building and scaling modern web applications. Specializes in React.js and the MERN stack with proven capabilities in backend integrations, real-time analytics, and secure payments. Experienced with Agile/Scrum methodologies, and modern authentication mechanisms including RBAC and Keycloak.

PROFESSIONAL SUMMARY

- **Frontend Development:**
Proficient in **React.js**, **Next.js**, **TypeScript**, **Redux**, and modern **JavaScript (ES6+)** for building interactive, component-driven, and high-performance user interfaces. Experienced in managing state, optimizing rendering, and implementing responsive design principles.
- **Styling & UI Design:**
Skilled in **Tailwind CSS**, **Styled Components**, **CSS3**, and **Bootstrap** to develop clean, responsive, and visually consistent interfaces. Focused on creating user-centric designs and reusable UI patterns.
- **Backend Exposure:**
Hands-on experience with **Node.js**, **Express.js**, and **GraphQL** to develop scalable server-side logic and APIs. Built secure payment workflows with **Stripe** and enabled live data processing using **WebSocket's/Socket.IO**.
- **Database Technologies:**
Experienced in working with **PostgreSQL**, **MySQL**, and **MongoDB**. Capable of writing optimized SQL/NoSQL queries, managing schema design, and handling real-time data analytics with complex joins and aggregations.
- **Authentication & Security:**
Implemented robust authentication and authorization flows using **Keycloak**, **JWT**, and **RBAC**. Designed REST APIs with secure access controls for user and admin-level roles.
- **DevOps & Tools:**
Familiar with **Git**, **GitHub**, **Jira**, and **CI/CD pipelines** to support version control, agile development, and automated deployments. Proficient in agile practices such as sprint planning, code reviews, and task tracking.

TECHNICAL SKILLS:

Frontend	React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, Styled Components, CSS3, Bootstrap
Backend	Node.js, Express.js, GraphQL, Stripe Integration
DevOps Tools	CI/CD, Kubernetes, Docker, Argo CD, ECS, Code Commit, Code Pipeline
Databases	PostgreSQL, MySQL,
Cloud Platforms	AWS Cognito, AWS S3
Third Parties	Key clock, Stipe, Superset,

EDUCATIONAL QUALIFICATION

Bachelor's of Technology (Electronic and Communication Engineering) passed out in 2022

PROJECT PORTFOLIO

ULCMS – E-Learning Management System

Domain: Education / E-Learning

Tech Stack: React.js, Node.js, PostgreSQL, Keycloak

Description: A secure and scalable Learning Management System (LMS) designed to manage courses, users, and assessments. The platform features a dynamic quiz engine, course progression tracking, and user role segregation via Keycloak. Supports modular course delivery and seamless user experience.

Role Summary:

- Worked as a Full Stack Developer in a team of 4 members.
- Built reusable UI components for course content, quizzes, and user profiles.
- Integrated Keycloak for authentication and Role-Based Access Control (RBAC).
- Implemented dynamic data fetching and caching using React Query.

Fleet Management System

Domain: Transportation / Telematics

Tech Stack: React.js, Java, PostgreSQL, Konva.js, Socket.IO

Description: A real-time fleet monitoring solution for tracking vehicle location, fuel consumption, and driver behavior. Features include GPS path visualization, alerting for speed and idle events, and live data streaming. Includes geofencing and analytics dashboards.

Role Summary:

- Built interactive dashboards with live tracking using WebSocket
- Implemented geofencing, fuel analytics, and telemetry visualizations.
- Wrote optimized PostgreSQL queries for generating fleet insights.
- Developed modular components for event logs, engine diagnostics, and alerts.

Go Perla – SaaS Document Analysis Platform

Domain: SaaS / Document Intelligence

Tech Stack: React.js, Node.js, GraphQL, AWS Cognito, MongoDB, Redis, AWS S3, Stripe

Description: A multi-tenant SaaS platform for uploading, processing, and analyzing legal and financial documents. Offers role-based access, secure file management, and subscription-based billing with usage tracking.

Role Summary:

- Designed secure login flow using AWS Cognito and implemented RBAC.
- Integrated Stripe for billing, invoicing, and plan subscriptions. healthcare personnel and administrators.
- Used AWS S3 for file storage with pre-signed URL uploads.
- Optimized frontend with lazy loading and modular component architecture

Video Editor – Poster & Video Customization Tool

Domain: Media & Design

Tech Stack: React, React.js, Konva.js, PHP, Postgres

Description: A browser-based visual editor for customizing posters and videos using drag-and-drop features. Allows users to edit layers, insert text, and manage visual elements using an HTML5 canvas.

Role Summary:

- Developed a canvas-based drag-and-drop interface using Konva.js
- Implemented poster and video editing features like object manipulation, resizing, and layering.
- Enhanced user interaction with real-time previews and undo-redo functionalities.
